

UMM-E-AIMEN

Web & Mobile Application Developer | Flutter | React Native | Firebase

Attock, Pakistan | ummeaimen.8663@gmail.com | +92 317 5366272 | github.com/Umme-Aimen-8663 | linkedin.com/in/umm-e-aimen8663

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate and Web & Mobile Application Developer with hands-on experience building cross-platform apps in Flutter and React Native, integrating AI models and third-party APIs, and shipping complete full-stack web projects. Currently completing a Full Stack Web Development internship at CloudExify. Comfortable working end to end — from DSA/OOP-driven logic to polished, deployed user interfaces.

WORK EXPERIENCE

Web & Mobile Development Intern

Summer 2026

CloudExify

- Designed and deployed a personal portfolio website (HTML5, CSS3, vanilla JavaScript) with a custom design system, dark/light theming, and full accessibility support.
- Built responsive, cross-device layouts and interactive UI features including live theming, scroll-based animation, and form validation.

SKILLS

Mobile Development: Flutter, React Native, Expo

Web Development: React, HTML, CSS, JavaScript

Backend & Cloud: Firebase, REST APIs

Programming Languages: Python, JavaScript, Java (basics), C++

Databases: SQL, MongoDB

Applied AI: Machine Learning, AI, Computer Vision (basics)

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Programming Fundamentals

FEATURED PROJECTS

EduNest — AI-Based Student Study Planner

- Built a study planner app for managing tasks and schedules, integrating Google's Gemini AI model for personalized study assistance.
- Implemented a "Watch Later" feature using the YouTube API so students can save learning videos without leaving the app and getting distracted by YouTube's feed.
- Added an AI-driven mock interview module to help users prepare for technical and general interviews.

Tech: Flutter / React Native, Firebase, Gemini AI, YouTube API

Multiple Disease Detection System

- Built and evaluated machine learning models to detect multiple diseases from patient data, comparing algorithms for accuracy and reliability.

Tech: Python, Machine Learning

Quick Bites — Food Ordering & Delivery App

- Developed an app that helps customers discover nearby restaurants and order available food for doorstep delivery.

Tech: Flutter, Firebase

Smart Home Controller

- Built a Flutter app to control smart-home devices over the MQTT protocol, tested end-to-end with MQTTx.

Tech: Flutter, MQTT, Dart

ADDITIONAL PROJECTS

- GDG Management App — management app built for a Google Developer Group chapter.
- Cookbook (Flutter) — recipe browsing and cookbook mobile app.
- Robo Navigation System — autonomous navigation logic built using multiple AI search/pathfinding algorithms.
- Student Registration System — built using core Data Structures & Algorithms concepts.
- E-Commerce Shopping System — built using Object-Oriented Programming concepts.
- Student Management System — built using OOP and Programming Fundamentals concepts.

EDUCATION

Bachelor of Science in Computer Science 3 Years Complete · Final Year in Progress

COMSATS University Islamabad, Attock Campus

F.Sc. (Intermediate)

Army Public School and College for Girls, Attock Cantt

Matriculation

F.G. Public High School, Attock Cantt
